

Last November, Mills Peninsula Women's Center was recognized as a Breast Imaging Center of Excellence by the American College of Radiology. The college awards this highest level of recognition to those centers which provide the highest quality of care in the area of women's health. The application process and case selection review were overseen by myself, along with Ann Costas, with the support of our amazingly dedicated staff. Our mammography, stereotactic biopsy, breast ultrasound and ultrasound guided biopsy programs were peer reviewed by expert physician and physicist and felt to exceed the highest quality of care. We are so very proud of what we do here at the Women's Center to improve the health and lives of women and we are so very thrilled to receive this professional recognition from the American College of Radiology that we are indeed a center of excellence.
